

List 2 (dental diseases)

A) The noncarious defeats of the hard teeth tissues

1. Hyperesthesia
2. Hypoplasia of the enamel
3. Fluorosis
4. Erosion of the hard teeth tissues
5. Wedge-shaped defect
6. The pathologic abrasion of the teeth
7. Necrosis of the hard teeth tissues.

B) The pathology of the tissues of the periodontium:

8. Parodontitis
9. Parodontosis
10. The idiopathic diseases of the periodontium

C) The pathology of the mucous membrane of the oral cavity

11. The ulceronecrotic defeat of oral mucosa
 12. The secondary bacterial diseases (diphtheria, tuberculosis, syphilis)
 13. The disease of oral mucosa with dermatosis with the autoimmune component of pathogenesis (pemphigus, lichen ruberplanus, lupus erythematosus)
 14. The change of oral mucosa with the allergic defeats
 15. The change of oral mucosa with the intoxications with salts of the heavy metals
 16. The symptomatic virus disease (AIDS, influenza, foot-and-mouth disease, infectious mononucleosis)
 17. The symptomatic manifestations on oral mucosa with the diseases of gastrointestinal tract (ulcer, gastritis, enteritis, colitis, chronic hepatitis)
 18. The symptomatic manifestations on oral mucosa with the diseases of cardiovascular system (insufficiency of blood circulation, essential arterial hypertension)
 19. The symptomatic manifestations on oral mucosa with the diseases of endocrine system (acromegaly, disease and Itsenko- Cushing syndrome, diabetes mellitus)
 20. The symptomatic manifestations on oral mucosa with the diseases of the blood (anemia, thrombocytopenic purpura, leucoses)
 21. The symptomatic manifestations on oral mucosa with the hypo- and avitaminoses
 22. The disease of the tongue (desquamative glossitis, diamond-shaped glossitis, plicated tongue, hairy tongue)
 23. The neurogenic diseases of tongue (glossodinia, ganglionitis)
 24. The independent cheilitis (actinic, meteorological, contact allergic, glandularis, exfoliativa)
 25. The symptomatic cheilitis (eczematous, atopic)
- D) The precancerous lesion of oral mucosa and red border of the lips
26. The obligatory precancerous lesions (disease of Bowen, warty precancerous lesion, limited precancerous hyperkeratosis, Manganotti's cheilitis)
 27. The facultative precancerous lesions

List 2.1 (basic dental diseases)

A) The pathology of the teeth

1. The caries of the temporary and permanent teeth
2. The disease of the pulp of the temporary and permanent teeth
3. The periodontitis of the temporary and permanent teeth

4. The traumatic damages of the temporary and permanent teeth

B) The pathology of the tissues of the periodontium:

5. Gingivitis

C) The pathology of the mucous membrane of the oral cavity

6. The traumatic defeats

7. Virus diseases of oral mucosa (acute herpetic stomatitis, which relapses herpetic stomatitis, shingles)

8. The fungus diseases of oral mucosa
