

REGULATIONS

carrying out of the practical-oriented governmental examination
from the specialty “Dentistry”

The Practical- oriented governmental examination in the specialty “Dentistry” is carried out by GEC in the form of complex governmental examination simultaneously on 5 departments of the stomatological department: conservative dentistry, surgical dentistry, prosthodontic dentistry, children's therapeutic stomatology, ortodontia and the propaedeutics of orthopedic dentistry of 4 profile disciplines. Examination consists of two parts:

- the first part - directly work with the patients at the examination (examination and the make of preliminary and final diagnosis and carrying out of treatment the minimum of two sick different stomatological diseases);
- the second part - work with the models, the phantoms, the training-demonstration benefits and solution of clinical situations.

For preparation and composition of the complex practical-oriented governmental examination 5 brigades of the examiners are formed, who consist of the representatives of each department and members of governmental examination commission. One brigade of examiners works on one of the departments and assumes examination in 6 students during 1 examination day.

Student passes skills within all divisions of specialty “Dentistry” during the reception of 2 patients and from work on the phantom.

From each division of discipline the student passes 5 skills and 1 skill due to the urgent states, in all at the examination -- 21 practical skills.

Data of examination are introduced into the specially developed protocol of the practical-oriented governmental examination (addition).

The correctness of the fulfillment of skills is evaluated on the basis comparison with “the algorithm of fulfillment”, developed for each skill.

For the preparation for the delivery of examination not less than 7 days is given to students.

The beginning of practical examination into 8.00, the distribution of groups on the departments are conducted during the day of examination.
